

Securrence - the perfect Front End Solution for Office 365

Add instant email access and availability given any kind of MS 365 outage – with Securrence Continuity

When Microsoft 365 becomes unavailable for any reason, simply login to your Securrence Continuity account to access and send email. The fact that you've switched over to Securrence is completely transparent to your email recipients — your sent messages continue to appear as though they're coming from your Outlook client as usual. Once 365 is back up and running, Securrence will redeliver all the email sent to your Continuity mailbox.

Vastly improve your Office 365 exchange service with improved email accuracy, redundancy, instant email message recovery and unique effective help desk tools.

Get the Best and Resolve False Positive Issues. Securrence provides the most effective and efficient email filtering possible with 17 layers of Anti-virus, phishing and spam blocking power — and it does so with the lowest possible number of false positives. Securrence provides multiple tiers of redundancy, backup and recovery with features like Shadowing, Continuity and Archiving. In addition, Securrence is hosted in US

Internet's ultra-secure world class SSAE 16 Data Center, which supports compliance with legal requirements like Sarbanes-Oxley. These factors make Securrence the first choice for law firms, health care providers and other sectors that need first-rate performance out of their email management system.

Securrence brings your mission critical email to the next level with:

- ▶ Email Shadowing. Frustrated trying to get an email message restored using Office 365? With Securrence you get Shadowing - 90 days of instant email recovery of any inbound or outbound message.
- ▶ Email Continuity. Office 365 has and does go off line. With Securrence Continuity you will be able to receive and respond to mission critical email even when 365 becomes unavailable.
- ▶ Notifications. Receive an email or a mobile phone SMS message when your 365 system is down.

- ▶ Mail Queuing. Securrence immediately queues all email for 30 Days.
- ▶ Enhanced Administrative Features. Managers enjoy Securrence's easy to use admin portal, comprehensive management tools, spam digest and quarantine, easy release system, admin and user notifications.
- ▶ Per-User Routing. Deliver mail to more than one location, e.g. to both your company mail server and personal POP mail.
- ▶ Live Expert Help Desk. When you call for help do you find yourself waiting in queue in an overseas call center? With Securrence you always get a live expert who can help you resolve issues and get things setup the way you need them to be.
- ▶ Redundancy. Securrence provides multiple tiers of redundancy of backup and recovery with features like Shadowing, Continuity and Archiving.

Securrence™

The Securrence Advantage

Why do top-ranking email managers prefer Securrence? In addition to the features listed above, Securrence is respected as the only proactive Signature-Based email filtering and management solution.

Why "Signature-Based"? Since spammers and hackers are continuously coming up with new angles on how to penetrate security measures and get at your data, does it make any sense that a single static method would be an effective safeguard? There are lots of them out there - Bayesian algorithms, honeypots, pattern detectors-and many providers who resell them.

Instead of relying on a single filtering method, Securrence takes a dynamic approach that incorporates the best and most relevant of all effective filtering techniques. Signature-Based means that our dedicated team of experts monitor and analyze email messaging day in and day out on a global basis. They develop signatures that identify, flush out and counter all of the latest spamming techniques and viruses as they evolve and appear. Not only does this produce the most effective and efficient email filtering possible, but it does so with the lowest possible number of false positives.

Isn't that what you want your email filter to do?
